

2015 ACCOMPLISHMENTS

DBP Data Center, Inc. has been continuously supporting DBP's Information Technology infrastructure for the past 33 years. In 2015, DCI continued to focus primarily on assisting the Bank's initiatives on various bank products by providing the workforce for the development and maintenance of the Bank's systems and applications. Further, DCI also started to seek opportunities to increase revenues by expanding its customer base to include government agencies and instrumentalities. This was made possible by the GPPB Resolution 12-2013, No. 3 amending Section 4(c) of the Implementing Guidelines on Agency-to-Agency Agreements (Guidelines) and deleting the second paragraph that excludes non-chartered GOCCs as Servicing Agencies.

Background

Aligned with DCI's strategic plan for 2014-2016, DCI pursues an aggressive business plan to deliver high-quality services, build an excellent team, and capture competitive market share in the industry.

Below are some of DCI's notable accomplishments in 2015.

- **DBP Opportunities**

1. DBP IT Staffing – Among DCI's core competencies is identifying the right people suitable for augmenting the IT staffing needs of the Bank. As of December 31, 2015, DCI has a total of one hundred and forty-five (145) strong workforce working closely with the Bank's IT requirements.

- **Non- DBP Opportunities**

The Company has started opportunities and negotiations on non-DBP projects focusing on government agencies and instrumentalities such as:

1. Philippine Port Authority (PPA) – This is an on-going consultancy project (six months contract) where DCI provides Business Process Review (BPR) to maximize the use of their current system. Visits to PPA ports such as Batangas Port and Cagayan de Oro Port were done in October and November 2015. On-going ports visitation to be done in early part of 2016.

2. Zamboanga Del Norte Medical Center – This is also an on-going project (5-year contract) where DCI provides Hospital Information System for the LGU hospitals. Full implementation (formal launch to live production) last November 27, 2015.
 3. Bureau of Customs – This is an on-going project related to Cyber Security package solution.
- **Other Opportunities** – Development of Applications. DCI has started development of various solutions and applications for clients' need such as PEZA, Philippine Postal and other government agencies. The applications are:

1. **Online Payment Platform Solution**

DCI Online Payment Solution is a pre-developed generic e-commerce payment portal using the internet to transmit information that would help agencies accept or disburse payments for its various service fees. It can be done with the use of equipment such as computer or laptops and even mobile phones and tablets with internet connection, thus eliminates the long queue in processing payment at the agency's physical site.

2. **Project Management Cloud-based Tool**

DCI Project Management Tool is a web application that stores project activities and its corresponding status and issues. The tool would help manage DCI's projects and maximize efficiency by providing users the access and updating of status of assigned issues.
